SUMMARY

Full-stack engineer with 10+ years of experience building web applications, most recently with React, Next.js, TypeScript and Node.js. Most of my work is on the front end: turning designs into working interfaces, keeping pages fast, and making features work well on desktop and mobile. I've worked at product companies and consultancies, and remotely for US teams since 2020.

SKILLS

Front end	React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS
Back end and data	Node.js, Next.js, Express, PHP / Laravel, Ruby on Rails, PostgreSQL
Tools	Docker, GitHub CI/CD, Jest, React Testing Library, Honeybadger
Web platforms	WordPress, Squarespace, Webflow
AI-assisted dev	Claude Code, Claude Design, GitHub Copilot

EXPERIENCE

Senior Full-Stack Engineer (Contract) · Cream + Sugar Creative — Feb 2025 – Present
Design agency · Remote

- Built client projects from the agency's Figma designs in WordPress, Squarespace, Webflow and Next.js, including a healthcare research survey site and an internal tool for healthcare teams.
- Built utility tools for clients, such as scripts that collect site data into Google Sheets reports and reuse content across a site, replacing manual exports and copy-paste updates.
- Maintain live sites for the agency: new features, bug fixes, third-party integrations and technical advice.

Full-Stack Engineer · The June Care Company — Jan 2022 – Feb 2025
Childcare marketplace · Remote

- Built in-app chat, provider matching and map-based search for a marketplace app connecting families with childcare providers, on desktop and mobile.
- Added Stripe payments so families could pay providers directly in the app.
- Reduced bundle size and page load time with tree-shaking, lazy loading and dependency cleanup.
- Set up deployment pipelines on Google Cloud with GitHub CI/CD so the team could release to production daily; added LogRocket and Honeybadger to catch production errors.

Full-Stack Engineer · CoderPush — Mar 2020 – Jan 2022
Software consultancy · Remote

- Built SEO-friendly web apps with React, Next.js, TypeScript and Node.js for client projects.
- Turned wireframes into responsive UIs with reusable components; wrote Jest tests and reviewed code.

Software Engineer · Saritasa — Mar 2014 – Dec 2019
US custom software company, Vietnam office · Ho Chi Minh City

- Worked on many client projects, building front ends in Angular.js and React and back ends in ASP.NET and C#.
- Gave input on system design, APIs and database performance, working with US teams across time zones.

EDUCATION AND LANGUAGES

Higher Diploma in Software Engineering · FPT Aptech, Ho Chi Minh City, Vietnam
Languages: English, Vietnamese
